

The Intelligence Upgrade Plan

Abstraction

Upon completing the May semester, I conducted a thorough personal reflection and recognized that my technical and professional capabilities require significant growth. My proficiency in programming, deep learning, machine learning, and AI engineering is currently insufficient for my career goals. Furthermore, I have identified a clear need to upgrade my management abilities and improve the collaborative dynamics within my team. For addressing these gaps, the Intelligence Upgrade Plan aims to enhance my development in two core areas:

- Technical Mastery: I intend to elevate my programming skills, strengthen my theoretical understanding of deep learning and machine learning, and gain practical expertise in AI engineering.
- Management and Leadership Enhancement: I plan to refine my personal organizational efficiency while simultaneously improving team collaboration, workflow optimization, and project execution standards.

<i>Day</i>	<i>Date</i>	<i>Topic</i>	<i>Document</i>	<i>Practical</i>	<i>Learning Outomes (LOs)</i>	<i>Duration</i>	<i>Note</i>
01	Tues, Aug 11 th , 2026	Kickoff and Variables	Python Crash Course	Build a pocket calculator	Master basic syntax and variable management	2 hours	N/A
02	Wed, Aug 12 th , 2026	Lists	Python Crash Course	Personal Expense Tracker	Achieve proficiency in list manipulation	2 hours	N/A

03	Thurs. Aug 13 th , 2026	Conditions and Loops	Python Crash Course	To Do List Filter	Understand logic for program flow control.	2 hours	N/A
04	Fri, Aug 14 th , 2026	Dictionaries and Functions	Python Crash Course	Basic database user	Learn to write reusable code using functions and key value structures.	2 hours	N/A
05	Sat, Aug 15 th , 2026	NumPy Basics	Math for ML	Random matrix processing	Initialize and perform arithmetic on matrices.	2 hours	N/A
06	Sun, Aug 16 th . 2026	Break and Review					
07	Mon, Aug 17 th . 2026	Pandas Series	Math for ML	Calculate single column data	Process and filter one dimensional data.	2 hours	N/A
08	Tues, Aug 18 th , 2026	Pandas DataFrame	Math for ML	Visualize data (Histogram)	Clean and represent tabular data.	2 hours	N/A
09	Aug 19 th - Aug 23 rd , 2026	ML Core (Linear Regression)	ML For Dummies	House Price Predictor.	Understand basic model training and evaluation processes.	3 hours	N/A

10	Aug 23 rd - Aug 26 th , 2026	Statistical Learning	Elements of Stat. Learning	Titanic Classification (Kaggle)	Apply statistics to solve classification problems	3 hours	N/A
11	Aug 27 th - Sep 1 st , 2026	ML Systems	Designing ML Systems	Automated data cleaning pipeline	Build standard data processing workflows.	3 hours	N/A
12	Sep 2 nd - Sep 6 th , 2026	LLMs and LangChain	Learning LangChain	PDF Reading Chatbot	Integrate APIs and intelligent chatbot architecture.	3 hours	N/A
13	Sep 7 th - Sep 11 th , 2026	Research Skills	Paper Reading Guidance	Write a 300 word review of a research paper	Analyze and synthesize scientific literature.	2 hours	N/A
14	Sep 12 th - Sep 16 th , 2026	Final Review	Project Consolidation	Push code to GitHub	Complete a professional portfolio.	3 hours	N/A

Expected Outcomes (EOs)

- Master basic syntax and variable management.
- Achieve proficiency in list manipulation.
- Understand logic for program flow control.
- Learn to write reusable code using functions and key value structures.
- Initialize and perform arithmetic on matrices.
- Process and filter one dimensional data.
- Clean and represent tabular data.
- Understand basic model training and evaluation processes.

- Apply statistics to solve classification problems.
- Build standard data processing workflows.
- Integrate APIs and intelligent chatbot architecture.
- Analyze and synthesize scientific literature.
- Complete a professional portfolio.
